To the Friendly Reader.

Courteous Reader,

IN all Books an Epistle is as certainly due, as the Subject-matter of the Discourse; and where a Dedication is wanting, the Epistle Entitles the Reader to the Patronage of the whole. And though the Book is the same as to the usual Matter and Form, yet I have something to present thee with, which is different from both, and may perhaps be as well worth thy Notice, as it is really becoming my Duty to offer it; Non Nobis Sumus, &c. and it is something relating to the Cure of Diseases.

I do not bring to thee a Bundle of Medicines overcharged with Names and Unintelligible Words: Nor do I pretend them to be Panacea's, or products of the Universal Solvent, two things that are said to make Mankind Immortal; Professors, tho they dye daily, yet pretend to make others for ever. But I present thee here with a few safe and familiar Things that are both Cheap and Easy.

First, My Antiscorbutick Tincture, that Cures the Scorbute with all its Attendants, as Dropsy, Gravel, Jaundice, Giddiness, Hypochondriack Melancholly, Spleen, Vapours, &c. it is pleasant to take, and therefore fit for tender Constitution, all sorts but especially Women and Children. It is in half-pint Bottles, each 2 s. 6 d.

Secondly, My Pilulæ Catholicæ, or General Purging Pills, cleansing the Bowels of all Impurities, from whence Diseases have their Original in the Body; purging the Head, Joints, Reins, and Bowels: And is a fit Remedy for all Diseases of the Liver and Spleen, as Obstructions in general, Hypochondriack Melancholly, want of Appetite, Giddiness of the Head, Dimness of Sight, &c. The Box 1 s. 6 d. Also my Antiscorbutick Solutive Pill, fit for all tender Constitutions, an admirable Medicine in all Scorbuitick Accidents, and of excellent Use after hard Drinking; as also to be taken with the Waters; they hinder no Business, and are usually taken at Night.

Thirdly, My Diuretick Powder, of singular Use in the Gravel, Stone, Strangury, Dysuria, with other disorders of those Parts and Vessels: perhaps not a better thing to be taken for present relief like that.

Fourthly

Fourthly, My Pacifick Draught, almost Infallible in all Disorders of Pain, as Gripes of the Guts, Stomach, Spleen, and Hypochonders: Stays all Fluxes of the Bowels, as Disenteries, Diarrhea's, &c. and this not by a restraining Quality, but by strengthening the Stomach, and Parts weakened by the Disease; also of excellent Use in Defluencies, Coughs, Rheums, &c. Each Dounce-glass 1 s. containing three Doses.

I omit to mention other Specifick Medicines for Fevers, Agues, and other Disorders, of which those that have any occasion may be further informed, as well as furnished. Also for the satisfaction of those that are i firm, I will give them an Account of the Disease either by the Water, or otherwise, of which I shall say no more here, only assure them they shall be justly and honestly used by

From my House at the

Long have our *Kings of England* claim'd as Right,
 To Rule at home, and others send to Fight.
 You'll guess the reason; and for that ('tis true)
 The *Gallick Tyrant* doth refuse it too.
 Well! let them send; here we out-do them all,
 Great *William's* now our *King* and *General*.

THE INTRODUCTION.

WHEN Rome's Black Tribe set up their killing Cause,
They bid defiance to our Rights and Laws.

'Twas then we groan'd under a heavy Fate;
Liberty languish'd, so did *Church* and *State*.

Yet *Papists* did not solely carry't on,

'Twas by another sort of *Saints* begun;

Nay! by these latter most base Things were done.

Those *Roaring Saints*, that run Religion down,

And *Dunk*, *Swore*, *Murder'd*, to support the Crown.

By their dull Teachers taught, to them they bow'd,

And from their Rules, that slavish Conduct flow'd.

Beg'd to be *Slaves*; beg'd *Popery* by a Law,

And gave up *Rights* and *Charters* with *Huzza*!

Address'd their King with mighty Strains of Sence,

And thank'd him for dissolving *Parliaments*:

The *Boys* at last too, order'd were to do't,

And by that Government encourag'd to't.

To serve the Court, the Country was betray'd,

By force of Arms they did our *Rights* invade,

And *Shams* and *Riots* false Elections made.

Thus *Mayors* and *Sheriffs* were chose by Threats and Ave.

Done by Court-precepts, and a drinking Law.

Packet Juries hence were got, for where and when

They wanted such, their *Makers* knew the Men.

Thus *Ruffel* fell, thus many more besides,

Thus the brave *Sidney*, and poor *Cornish* dy'd,

And thus at *Oxford* too was Colledge try'd.

Thus English Blood by Cruel *Knives* was spilt,

When those that judg'd were over charg'd with guilt;

The *Malefactors*, grave as *Judges*, sway'd,

The *Criminals* gave Laws, the *Just* obey'd

Now, which is best (and let each take his Doom)

An English *Tory*, or a French *Dragoon*?

A *Cut-throat Witness*, or a *Swearing Drudge*,

A *Murdering Jury*, or a *Whipping Judge*?

A *Regula* or, or *Mandamus Mayor*,

Shav'd *Priests* at Court, or a gay *Nuncio* there?

An *Inquisition*, or *Good-friday Rod*;

A burning Faith, or a fine *Pocket-god*.

January hath XXXI Days.

Let Heavens awful Power now controul,
 And by its artful Force sway every Soul.
 Let that decree't (all Hostile Beams restrain)
 To give the Universe its Peace again
 Let all comply, and those that ought, repent,
 And all the lesser Deities consent.

Had the Late King prevail'd, long since ye'd felt
The cursed Fury of *French Government*.

And been *Dr. Good* & too. *modest* & *humble*.

February hath XXVIII Days.

So many Oppositions, these the Foes
 And Enemies that Europe's Peace oppose.
 Hence new Ferments, hence the Storms appear,
 Kingdoms disturb'd, a foul and ruffling Air.
 Can Idlers and Strollers meet, and nothing done,
 No Clippers taken, nor a Plot begun?

You might have then sung *My Bays up go we!*

Observations.

Here we find *Jupiter* on the place of the last great Conjunction, and *Mars* and *Mercury* in Opposition to him there. Nay! the *Sun* and *Moon* at the Lunation are in Opposition to him too, but the most to be observed is the former; it shews great Division and Opposition in Councils and Publick Meetings. It also shews the Highways will be infested with Thieves and Robbers, and that Highwaymen, Clippers, Coyneers, and Plotters will be very unsuccessful in their Employments about this time; and perhaps some Banker or Eminent Trader may retire, his Affairs obliging him or them so to do.

Jupiter is now on *King James's* Ascendant, and instead of doing great things there for that ill-advised Gentleman (as a certain tick-skull'd Astrologer did imagine), I doubt it will plunge him into untoward Misfortunes, and shews mischief to him and his Party.

March hath XXXI Days.

Good News arrives, and bids the Just prepare
 (After the Clouds and Storm.) for quiet Air.
 Endeavours us'd, and mighty Interest made,
 And yet with Opposition things are sway'd.
 'Tis Saturn's Square, the four Merment gives
 That fatal Enemy to all that lives.

March, 1695.

This is the man our *Saints* do most implore
To save their *Church*, who ruin'd all before.
A pleasant Story! if observ'd, it hath
One that's no *Christian* to preserve their *Faith*.
Are these the thinking men, that beg a *Storm*?
And thus *Enslave* their *Fleets* before they're born.

At the *New Moon* we find all the *Cœlestial Family* under the *Earth*, except *Jupiter*, and he is in an obscure *House* too, i.e. in the *Eighth*, and the *Sun* and *Moon* is with *Mars* in the *Third*, and *Venus* and *Mercury* in the *Fourth*, in *Square* to *Saturn*.

From whence we may judge, that there are great *Councils* in divers *Countries*, and weighty *Affairs* under their *Consideration*. There are also great *Confusions* and *Consternations* among some *People* in *Europe*, and among great *Counsellors* and *Statesmen* in that *Country* and *Kingdom*, as well as among the *Commonalty*.

This is a *Month* of much *Publick Business* and *News*, altho early, and shews brisk as well as great *Preparations* for the ensuing *Summer*.

About this time also, there will be *Libels*, and such like *Scurrilous Reflections* on the *Government*; a *Statesman* dies; *France* in *Distress*; and *News* from *Denmark*, as if that *King* were enclined to begin a *War*, if he doth, he will repent it.

The *Trines* this Month affords, do all dispence
A Vigor and *Pacifick* influence;
 But all's destroy'd by *Mars* and *Saturn's* Square;
Passion forays Mankind, *Storms* disturb the Air.
 About the middle if observ'd, you'll find
 A various sort of Weather, Rain and Wind

May, 1695.

He'th made (and still he *future Ruin* craves)
 His *Neighbours Beggars*, and his *Subjects Slaves*.
 There's none grown *rich* by all that he hath won ;
 His *Kingdom's ruin'd*, and *himself* undone :
 Glutted with *Spoils* ; Nay ! Gorg'd with *Human Gore*,
 Yet, like a Dog, he *wags* his *Tail* for more.

Here we find *Mars* and *Mercury* in Conjunction again, or rather one continued Conjunction for three Weeks or a Month together ; and at the New Moon in the Ascendent in Square to *Saturn* a little past. This still continues the Violence and violent Actions among Mankind. Hence *Conspiracies* and *secret Contrivances*, either to deface the *Coin*, or to promote other base Actions tending to Cheating, Thieving, or private Murders.

The Affairs of *Denmark* tend to Disturbance and Injury of some of their Neighbours, which in the end prove fatal to themselves.

This Month affords us an Eclipse of the *Moon*, whose Effects are of the same Tendency with that already mentioned at the beginning.

Mars in *Taurus* affects the Kingdom of *Ireland* towards the beginning of the next Month with some Change and Alterations in their Publick Affairs ; and also Disturbance by the *Rapparees*. The Opposition of *Saturn* and *Venus* threatens an Eminent Lady.

June hath XXX Days.

Here *Jove* and *Mars* from Active Parts prepare,
And at each other dart a hateful *Square*:
Nay, Sol and *Stilbon* too, as hot as they,
Brisk up to *Chronus*, says he must obey.

This shews some Action, *States-Men* at a stand;
Some *Brush* at *Sea*, and something done at *Land*.

June, 1695.

At home the poor Reform'd still feel his Rage,
Without respect either to Sex or Age.
If they their Duty to their God attend,
Immediately his Bloody Guards dorth send,
Slaves to his Will; whose brutish Souls conspire,
To act the utmost Rage he can desire.

Observations.

This Month begins with an *Eclipse* of the *Sun* in *Gemini*, and shews its Effects in the *City of London*, and in particular in the *Government* thereof; perhaps some little *Dispute* and *Differences* about *Officers* and *Officers*, &c.

Offers and *Propositions* made for *Peace*, but the *Effect* thereof without any *Success* at present; *Mercury* in *Opposition* to *Saturn* hinders its *Progress*, and gives a great deal of *false* and *lying News*, with *Libels*, and such like stuff.

Toward the latter part of the Month *News* of some *Action*, but not a *pitch'd Battel*: Something done by *Surprise* or *Stratagem*, and some *Blood* spilt in the *Action*.

At the Full *Moon* the *Sun* is in *Opposition* to *Saturn*, and the *Moon* in *Conjunction* with him, but applying; and several violent *Lunations* succeed: hence we may expect to hear of *Action* by *Sea*, with private *Mischiefs* by *Land*; and afterwards a sickly *Season*.

July hath XXXI Days.

*This Month's inclin'd to Heat, and also free,
Unless some Action at the end there be:
About which time the Heavens do prepare
For gentle Dews, and Rains, and humid Air.
Stilbon and Jove agree, and both combine
To leave the Lion for the Virgin-Sign.*

July, 1695.

Some to the Gallows, Rack and cruel Wheel,
Are doom'd, who scap'd the Souldiers Rage and Steel.
Some the Church takes: If her blest Sons desire
To scare the rest, they by the Flames expire
Some to the Gallies, Fails, or a worse Doom,
While those untouch'd remain to starve at home.

Observations.

The late Opposition of the *Sun* and *Saturn* is not wanting to shew its Effects in dividing the Councils of those Nations and Courts of Princes, where they have Debates and Consults about publick Business; and the rather because the *Sun* and *Moon* are the one in an exact *Mundane Parallel* with *Mars*, and the other just past it, and *Mars* in a Human Sign: from these we shall hear of some violent Actions both by Sea and Land, and this in the *Low-Countries*, *Flanders*, or the Frontiers of *France*. Some uneasy Spirits are endeavouring to disturb the Peace of *Scotland*; let them take heed they do not meet with a just Reward about the end of *August* or *September*.

And I am afraid the Peace so long talked of, begins to be laid aside, and new Measures will shortly be taken of another nature.

Let's add (seeing the thing is so well known)
One Jewel more to the most Christian Crown;
'Tis lewd and cruel, and a Beastlike Show,
And yet the Church thinks fit to have it so.
The Dead above Ground rot, through his Extent;
No Grave's allow'd for a dead Protestant.

Observations.

After things have been carried on smoothly and fairly for some time, and Matters seem'd almost to be accommodated, here comes in an unlucky Opposition of *Saturn* and *Mars*, and this upon the Full *Moon* too; and these Malevolents both in the tenth and fourth Houses.

Sudden and violent Commotions as well in the *Microcosme* as in the *Macrocosme*: Skirmishing on the Frontiers, and some Town taken by Surprize, or else bomb'd; Action at Sea attended with Destruction and Ruin: and some of the pious *Non-swearing* Party about this time or suddenly after catch'd in a *Plot*; and great probability of an Irruption, or Breach with one of the *Northern Crowns*, about some pretended Propriety of his or theirs.

The latter end of the Year like to prove the most active.

September, 1695.

Besides these publick Murders of the poor,
The private too, and numberless in store,
Who stood in's way ; and so of all sorts some,
Protestant, Papist, or Mahometan ;
Thus he King William would have murder'd too ;
But William's God and Lewis's were two.

Observations.

At the beginning we find a Cluster of good amicable Aspects, as if the Heavens were disposed to look friendly again upon Mankind ; but we find *Saturn* and *Mars* are still in a Zodiacal Parallel, altho they are a little separated from an Opposition ; and toward the end too the *Sun* meets with *Saturn*'s Square. We shall find this Month too will be full of Action according to the nature of the Rays and Aspects, and this from about the middle till the end of it.

It is a Month full of Business and Contrivance, *Mercury* is no less than six times in Aspect this Month with the other Planets ; but I fear toward the end *Mercury* is got into bad Company, and perhaps such as will bring him, or those by him represented, to the Gallows.

Observations.

Mars is got into *Leo*, a Sign of his own nature, hot and dry; this shews the *Souldiers* are active in those Countries where they reside, and that they make no great haste to get *Winter-Quarters*, which at this time are usually necessary.

Saturn is now in *Capricorn*, and there in Square to the *Sun* of late; this will give a sort of Illness among Mankind, a kind of a *Winter Disease* seizing the *Lungs*, and shewing it self by *Coughs*: it is also to be feared we may hear of a *Rot* among *Sheep*, and some other small *Cattel*, and this the rather because the *Sun*, *Moon* and *Saturn* were all angular at the last *New Moon*.

Mercury is in the treacherous Sign in Square to *Mars* in *Leo* the House of the *Sun*: Some little Sinners catch'd in a piece of *Knavery*, either *Libels*, *Clipping*, or some *Roguery* against the Government, you know by who.

November hath XXX Days.

As Sol by *Jove's* sweet Rays hopes to prevail,
Mars wipes his Honour with the *Scorpion's Tail*:
 At which Repulse he fearing *smarter Blows*,
Gravely withdraws, and to new *Quarters* goes.
 This shews some great Affairs now under hand,
 Oppos'd by some great *Martial* *Man's* Command.

Here's the great *Lewis*, Murderer in chief,
The grand Oppressor, and the Master Thief:
A *Turk* in Faith; a Friend to few but Knaves,
A Tyrant too, and that's a King of Slaves:
Where-e're he rules, Cruelty leads the Van;
This is the Master, find you out his Man.

There is an *Eclipse* of the *Moon* this Month, and *Mars* in Square to both the Luminaries; and so he was at the last *New Moon*, he being then in Opposition to the Mid-Heaven, and all but *Saturn* under the Earth.

This shews many close, clandestine Treaties and Consults transacted in divers Countries; and it may be also justly feared, not for the good of Mankind. *Mars* stirs up violent Commotions among the common People, either by Oppression or Want, in those Countries lately subjugated to new Governours. And I fear from the preceding Opposition of *Saturn* and *Mars*, considered with this *Eclipse*, a Winter-Sickness, and perhaps some Injury by Rains and Land-Floods; with Loss at Sea by stormy and foul Weather, North and North-East from England.

About this time the ☉ ad □ ☾ toucheth in the French Tyrant's Nativity.

December hath XXXI Days.

Let the *destroying Angel* now retire,
And the *sweet Charms* of *Peace* our Breasts inspire.
Let *France's Malice*, and *black Rome's Design*,
Want Means to act, and *shamefully decline*.

Let *England's Force*, her *envious Foes* restrain;
And let *King William* ever *Live* and *Reign*.

If they but hear he doth Success obtain,
Their slavish Suffrage Echo't back again.
I wish them his, and in his Power too,
That they might find (what they have oft heard) true.*

Is it possible the *French Lewis* should have any Peace while his *Sun* is under the Directions to the Squares of the *Moon* and *Venus*? I think not; and yet this Year's Revolution is a very good one: But if he hath not by this time purchased a Peace, he and his *Slaves* will soon find the sorrowful Effects of a continued War; and I really think that he will have some *Rebellious Commotions* in his *Armies*, or among his *slavish Subjects* at home, and this from the Square of the *Moon*.

Much false News and lying Reports spread abroad, some from Foreign Parts, and others at home. The Small Pox and Gripes of the Bowels are frequent and very common. The Air begins to prepare for a Frost and cold Weather: And so I end the Year.

God save King William and Queen Mary.

Preface. I do confess, this is a very strange kind of a *Conjunction*, and will really and solely sway the Actions and Affairs of this Winter-Quarter, and would take up more room to write my Opinion of its Effects, than I have allowed me for the whole Year; and therefore I will be as short as I can of the matter, without consulting or troubling you with the Opinion of any Authors about it. It is indeed a very ill *Conjunction* because they are all four according to their present Disposition of a Malefick Nature; and yet three of them have but a confined, limited Power, because they are under the Beams of the Sun; they would do mischief, but that they are afraid. Nay! they will do what mischief they can nevertheless, and their Effects seem to have a triple tendency. 1. To *Publick Affairs*, and so they hinder the advantageous Design under consideration for the Peace of Mankind, stir up new *Ferments* and *Heats* in the *Councils* and *Courts* of Princes tending to Ruin and Confusion; hatch and contrive Plots against the Established Government in a certain *Kingdom* of *Europe*, and all these things will be managed with great privacy, because they are under the Earth; but they will have the good Fortune to meet with Discoveries, because they are under the Sun-beams; and as they are *Traitors* to their *Lords* and *Sovereigns*, so they will be to one another; and these things will appear more plainly about the middle of *December*, the beginning of *January*, and towards the middle of *February*.

2. They will affect Mankind as to his Health and Constitution in general, stirring up preternatural *Ferments* in the *Stomach*, *Saline Acidities* in the *Blood*, disordering the *Archens*, and contaminating the *Micracosmical* *Escher* with a *Letthal* and *Malefick* *Humor*, threatening Death by *putrid Fevers*, *Obstructions* of the *Spleen* and *Hypochonders*, *Asthmatick Coughs*, *Agues*, *Hæticks*, and *Chronic Diseases* in general, and throughout the whole *Winter Quarter* in some Parts and Places, according as they are situated or governed by the prevailing malefick Stars.

3. They will affect the Air with strange and unusual Weather, the Season considered, and this more particularly in the Months of *December* and *January*, about the time of the *Perigæa*, and when the Sun comes to the *Conjunction* of *Mars* in *January*; and this I conclude will be by sudden Mutation from one extrem to another, sometimes very hot, then cold

with Corruptions, and other unusual Accidents, subject to Storms, Winds, and the like Intemperances, perhaps a violent Frost at last.

Now, if we consider that there are none in Aspect to the place of this *Conjunction* but the *Moon*, and she is indeed in Aspect to them all, and will help to assist them in whatever their nature leads them to effect, either Good or Bad, for she is in *Pisces* and Peregrine, but a Sign of her own nature.

You may observe that *Venus* is on the Horoscope in *Sagittary* in *Trine* to *Jupiter* in *Leo*, the place of the last great *Conjunction*, Anno 1682. which shews Endeavours are used and contrived to settle Peace, but at present impossible. The Affairs of this Quarter will be very private and closely carried on, and the Councils of Europe will be extremely busy and intent on certain things, but with what success, I will leave to time to shew. Yet, by what I can see by the Positions in general, those that are studious and busy to promote Wars and Confusions, will have more success than those that labour for and after Peace.

The Spring-Quarter begins March the 10th, at 30 min. past Eight of the Clock in the Morning, at which time 4 deg. of *Aquary* culminate, and 8 deg. of *Gemini* ascend the Horizon. In this Figure we find the Coelestial Family in a very good Humour, and in a good peaceable Posture, no Hostile Beams afflicting either the *Sun* or *Moon*. *Jupiter* still keeps his Court in the Coelestial Lyon, as if he intended to stay there to wipe off all the Calamities that the last *Conjunction* hath left as a Legacy to Mankind, and set the World again in *statu quo*. And to that purpose we find the *Sun* is going to his *Trine*, and the *Moon* to his *Sextile*; but before they can compleat those two Aspects, the *Moon* meets the Square of *Mars*, and the *Sun* the Square of *Saturn*; this shews that those means used for Peace meets both potent and vigorous Enemies, and that those who make a Trade of War, are not yet willing to beat their Swords into Plow shares, and their Spears into Pruning-hooks, and introduce that Prophecy of *Isaiah*, that Nation shall not lift up Sword against Nation, nor shall they learn War any more. No, no, that time is not yet come, but it is coming, and the whole Creation groans for it, and then will the Calamities of this miserable Life be commuted, and the

Malevolent Rays of the Stars shall then have no more Malignity in their Effects, than they had before *Adam* sinned and transgressed the Command of God in Paradise. But to return to our Scarry work again.

But if the Old Doctrine hold true, here is a great Argument from the Trine of *Mercury* and *Jupiter*, the one Lord of the Ascendant, and the other Lord of the Seventh; that the Confusions and Divisions of *Europe* should be ended and accommodated, and this the rather, because *Jupiter* is in the Fourth house, which shews the end of things, and applied to also by the *Sun's* Trine, who is Lord of that House; and that from the Eleventh house, in which Angle *Jupiter* hath the chiefe Dominions. *Pisces* his Nocturnal house being intercepted there. But that which carrieth the fairest Aspect to this undertaking, is *Jupiter* in *Leo* 17 degr. he being there exactly on the place of the second Conjunction, Anno 1682. The first meeting of the Superiors in Conjunction that year being in 19 degr. of *Leo*, the second in 17 degr. of that Sign, and the thrid and last in 15 degrees; so that *Jupiter* is on the middle one, and exactly 2 degrees from the first and last meeting at that Triple Conjunction, and there in Trine to *Mercury* in *Aries*, and to *Venus* also applying; the latter of which is in Reception with *Mars*, and the *Sun* is also going to the Trine of *Jupiter*, with a small kind of Reception also; the *Moon* separates from the Sextile of the *Sun*, (who disposeth of *Jupiter*) and applies to the Sextile of *Venus* and *Jupiter*, and Square of *Mars*. And besides these Rays we find the *Moon* in an exact Mundane Trine with *Saturn*, and *Jupiter* in an exact Mundane Trine with *Venus* and *Mercury*. Now, in my Judgment, the true meaning of these Positions shew a Disposition of Mankind in general to Peace this Year, and that there will be ways and methods used and propounded for the attaining of those ends, and this in divers Courts and Countreies of *Europe*, because we find the Planets so disposed and enclined by their Rays are posited in several Signs, and different parts of Heaven. Yet I must needs speak my plain Opinion, what I think of the success of such an Undertaking at this time, as well as mention it in general; we find *Jupiter* under the Earth in the *Imum Caeli*; *Saturn*, *Venus*, *Mercury*, and the *Moon*, are all Cadent, and none Angular in the whole Figure, except *Jupiter*, under the Earth, which is equal to the others Cadency

in

in the matter now under Consideration; and at the succeeding Ingress, there are none Angular but the *Sun* and *Mars*, and *Jupiter* in that Scheme is Cadent in the Twelfth house. Hence we may conclude, That there may be such an Undertaking, but that it will go on, but slowly and heavily, and take up a great deal of time to little or no purpose; and this seems visible if you will but take the pains to consider that *Saturn* and *Mars* are pretty strong, tho not Angular, one of which throws a *Square* in the *Moon's* way, and the other in the *Sun's*, which shews likewise that there will be not only a difference, but things of that kind will be openly and vigorously opposed. And yet I am of the Opinion, that from this time it will go on, and less or more it will be always under Consideration, till it is perfected and ended, which I am sure will not be presently or immediately after its inception.

In the Scheme of this Ingress, we find *Mercury* in the Twelfth house, out of his own Dignities, and *Venus* with him in her Detriment, and both of them in *Square* to *Saturn* in *Zodiaco*, and applying also to a *Square* in *Mundo*. *Saturn* you will find is Lord of the Tenth house, and so is a Significator of *Kings*, I mean such as have Kingdoms of their own, and Subjects able and willing to support them. I take *Mercury* and *Venus* here, to signify some of the *Conscientious Non-Coms* that hate swearing unless it is without Book; for tho they covet a *Directory* for Praying, yet they seem to hate a *Formal Oath* to their Superiors, being clad in any other fashion than the *Roman Cui*. I say, I take these two to signify a Couple (as Principals) of the *Plotting Party*, endeavouring to promote some base Designs against the Present Government, and may be very properly called a Plot. I confess the *Tories* were the only Men, and had certainly the best way to cure *Plotters*, and that makes me wonder that they should venture upon it now, lest they should receive the measure that they formerly gave; but any thing for a *Church* in the *Right Line*. But of this *Plotting Tribe* and *Society*, you will hear more on the *Square* of *Saturn* and *Mars* in *April*, and the *Opposition* of *Saturn* and *Mercury* in *June*, but more effectually of their witty Contrivances in or about *August*, on the *Opposition* of *Saturn* and *Mars* from *Cancer* and *Capricorn*, both Tropical and Cardinal Signs.

Judicium Astrologicum, Anno 1695.

It may be remembred that all the last *Summer*, 1694. and part of the *Winter* preceding, there was an untoward Fever attended with *Malignant* and *Pestilential* Symptoms, which swept away a great number of People; and even now, while I am writing of it, which is the end of *June*, it is generally complained of by People of all Qualities. Now, the reasons I give for that from second Causes, are these following: The *Sun* was afflicted by *Saturn*, at every one of the three preceding *Ingresses*, i. e. by his *Body* in *December*, 1693. by his *Square* in *March*, 1694. by his *Opposition* in *June*, 1694. which I judge gave both the Disease, and its Malignity, and by consequence we must expect some Effects parallel to these in the following part of this 1694. becau'e at the *Ingress* in *September*, he doth again afflict the *Sun* by his *Square*, and in *December* following by his *Body* again, in *Conjunction*. But in this Vernal Scheme, we find no such Position, or any Parallel to it, nor in the next following, being the Estival *Ingress*, whence in my Opinion, we may enjoy a more healthy Season this *Summer* 1695. Yet I must confess, as the *Sun* and *Saturn* are in *Conjunction* in *December* 1694. with other Malefick Rays at the same time, so I fear we shall have a sickly *Winter*-season, that may reach even to the *Spring*, and th's through *January*, *February*, and *March*, shewing it self by Putrification of the Blood, Diseases of the *Lungs*, *Pleurisies*, and *Coughs*, and other Diseases of Cold, being the Nature of *Saturn*.

Lastly, and so to conclude this Quarter, We find *Saturn* and *Mars* in *Sexstile*, and elevated above all the other five either by Dignity or Position, and all the benefic Stars are in obscure and abject parts of Heaven. Hence it seems, as if the Motives of War were stronger, and more prevalent than those of Peace; and that the Preparations for another *Summer's* Work is like to go forward, but the great and over-forward Actor therein seems to be at a stand, and he moves like *Pharaoh's* Chariots when the Wheels were off, heavily but yet it goes on in order to another Campaign.

The common Complaint abroad is for want of Trade, and I think justly enough; but I hear very few complain for want of Honesty, which is the most scarce of the two.

THe *Summer Quarter* begins this Year *June* the 11th, at 42 minutes past Nine of the Clock in the Morning, the 6th degree of *Virgo* ascending, and the 28th degree of *Taurus* culminate. In this Scheme we find no Positions that are remarkable, or likely to give any thing extraordinary from its own Influence and Power; and therefore those Positions at the preceding Ingress, will have a power and sway in the Effects and Actions of this Quarter also: And yet I will give my Opinion in a short Judgment on those things most fit to be considered in it; and they are these that follow.

The *Sun* we find hath been lately in *Sextile* of *Jupiter*, and *Conjunction* with *Mercury* separated seven degrees; and is now going to the *Opposition* of *Saturn*, but at the distance of twelve degrees, and this from the Tenth and Fourth houses; but *Saturn* is in the Figure in the Fifth, and is Lord of both Fifth and Sixth. Hence I judge their Influences will be spent in defeating and disappointing the Affairs of *Embassies* and *Ambassadors*; or at least ways clogging their Business and Designs with things and matters not expected. It also shews the Death of Great and Eminent States-men; it afflicts others of them with the *Gout*, and also puts the Affairs of some King in *Europe* into an ill Condition. And also it seems to presage some kind of *Action at Sea* in the end of *July*, the middle of *August* and *September* under the Influence of the *Opposition* of *Saturn* and *Mars* from the same parts of Heaven, or very near it, but principally and most chiefly influenced from the Square of *Saturn* and the *Sun* at the Vernal Ingress. And that which makes me judge, that it will give some Action by Sea, is, because *Mars* is in the *Medium Caeli* in his Detriment and Peregrine, and in a Zodiacal Square with *Jupiter*.

The *Moon* is naturally a Significator of all the Common and most General Actions of our Lives, of *Messengers* also, *Travellers*, *Popes Legates*, &c. And in this Figure, for that reason she doth by a double Power personate and signify *Ambassadors*, *Envoys*, *Residents*, and Men in general of that Power and Office. I do therefore hence judge, that there will be some motions for Peace, and either some new Treaty begun, or else some old one revived in order to something of that nature, and this done and managed by Men of Eminent Characters and Reputation, at or about this time, or within the com-

Judicium Astrologicum, Anno 1695.

pass of this Quarter; but I do indeed judge it will have but a very slender and sorry Effect at present, if not perfectly refused, denied, and laid by, at the command and dislike of a Saturnine Man, as you may see by the Opposition of Saturn and Mercury just at hand, from the Fifth and Eleventh houses, and from two Cardinal Tropical Signs also. And as the Moon applies here to the Sextile of Jupiter, and Trine of the Sun, so I judge there will be a good seasonable, as well as a plentiful Harvest, and that especially of the more useful Grains.

There is little else in the Scheme of this Ingress than what I have toucht upon, and what is, hath a tendency to some of these Things and Affairs here mentioned. And of those especially, that have a violent Ferment in them, and threaten mischief and ill.

The Autumnal Quarter begins September the 12th, at 19 minutes past Eleven of the Clock at Night, 1695. and in the Scheme there is 19 degr. of Cancer ascending, and 19 degr. of Pisces culminating with the Moon in the Tenth, Mars in the Ascendant, and the Sun and Mercury in the Fourth; and if we may allow the time nearly true, there is a Mundane Payalies between Saturn and Mars, and a Mundane Square between Mars and Mercury.

The Figure of this Ingress hath a very angry Face, and seems attended with a Spirit of Violence; for we find four of the seven Wanderers do possess the four Cardinal Signs of Aries, Capricorn, Arias, and Libra, and this also influenced from a preceding Eclips of the Sun in Gemini, and in the forward Opposition of the two Malevolents, Saturn and Mars, from Cancer and Capricorn. And in November following an Eclips of the Moon in the end of Taurus, near the Pleiades, in Square to Mars in Leo, near the Lyons heart.

These things considered, both in general in the Figure, and in particular with the Affairs of this Season, shew, that this is like to be one of the most active Quarters in the whole Year, and the Actions attended too with the most Violence, being managed with the most Vigor and Force in whatsoever the Effects relate to. It is not customary to expect any great Hostilities at this season, by any Military force; and yet, where there are Armies in the Field, I dare be positive there will be Action; or else where there are Treaties of
Great

Judicium Astrologicum, Anno 1695.

Great Councils, they will be managed with great Heat and Violence in their Debates, and such like Contests that do attend such Meetings and Assemblies of *Kingdoms* and *Nations*. And yet I am perswaded, That altho Things and Men are so ill disposed at present, yet they will produce more healing Effects in the Conclusion, because those Planets that are *Angels*, are for the most part in their own Dignities, which need such men concern'd that have a Power, and are able not only to act, but to act effectually in the Affairs that they are employed in by their several Matters.

The *Moon* (saith *Messabala*) signifies the Common People in general, and the *Sun* doth signify *Kings*; and here we find them in Opposition from the Tenth and Fourth houses, which may in my Judgment, stir up some Commotions between the *Common sort* and their *Governors* in some *Foreign Kingdoms*, and also cause Insurrections, that seem to threaten a general Defection in those Countries where they happen. And indeed I think that this kind of Fate will be common to several Parts of *Europe*, but especially the more *Easterly* and *Southern*, with some part of the *Turkish* Dominions. And the reason that I judge these kind of Effects, is, because there was an Opposition of *Mars* and *Saturn*, in exact Square to the place of the *Moon* in this Scheme. And of such an Opposition, *Guido* *de* *Marino* says, 'We must expect Division and Difference between the Great men and Commonalty, between City and City, and that there will be Publick Injuries, Contentions, and Quarrels. And *Morinus* says, That *Cancer* is the worst Sign of the Twelve for a Conjunction of *Saturn* and *Mars*. And so, it must I am sure be one of the worst for an Opposition too; and the principal Effect of that Sign is to give Tumultuous Meetings and Consults; as you may see, if you please to look back after the Years 1444, 1504, 1563. being the Years when the Conjunctions of *Saturn* and *Jupiter* fell in *Scorpio*, and there you will find what Confusions the *Chronicles* and *Histories* tell of those times, as to *Wars*, *Murders*, and *Insurrections*. It is the Opinion of some Authors, That an Opposition gives Pestilential Diseases, and the Destruction of Mankind by that means; but in this particular I dissent from them; yet I will allow it to give an Autumnal Disease, partly a *Fever*, and partly a Disease of the *Bowels* and *Stomack*, shewing it self by Gripes in those parts, with a
Feverish

Februarii and *Agustis* habit of Body in those taken with the kind of Disease. You see there was an *Opposition* of *Saturn* and *Mars* did preceed this Ingress, and at the time of the Ingress they are in an exact *Mundane Parallel*, not unlike the *Opposition* in effect. And of such Positions, the Learned Doctor *Goat* tells us, the Aspects of those Stars afford tempestuous and foul Weather of all sorts. And yet *Placid de Titis* in his *Ephemerides, in fine parisi primi*, says, That the Rays of *Saturn* and *Mars*, because of their excess in Quality, do inhibit blowing windy Weather; yet allows when they do give it, it is of a mischeivous and an unhealthy nature, and tends to the ruin of all Living Creatures, by stirring up a destructive Ferment in the Principles of Nature. Yet both these Learned Authors seem to have a greater respect to the *Conjunction* than to the *Opposition* for producing such kind of Effects. Yet I dare be positive, that at this time the *Opposition* of these two ill temper'd Gentlemen will convince those that doubt in the Point, in reference to stormy and all other tempestuous Weather in different Parts and Kingdoms of the World, and this in the Quarter succeeding the *Opposition*. But because they have both laid down Rules for judging the Weather in general - I will refer the Ingenious Readers to their own Words for a more perfect Satisfaction in the matter.

It may be observed, That just before this Ingress, there was a *Trine* of *Saturn* and *Jupiter* from *Virgo* and *Capricorn*, from which Signs by Retrograde motion they make two of the like Aspects again in the following Year 1696. That their Effect may prove pacifick, is heartily wished.

Of the Eclipses in the Year 1695.

Four times will the great Luminaries of Heaven be hid from the Inhabitants of this Earthly Globe this Year. Twice will the *Sun* suffer by the Opaque Body of the *Moon*, and twice will the *Moon* lose her borrowed Light.

The first will be an *Eclipse* of the *Moon* on the 18th day of May, at 23 minutes past Ten before Noon, and will be invisible at London, and this part of the Hemisphere.

The second is of the *Sun*, *June* the first, a little more than half an hour past four of the Clock in the Afternoon, and may

seen at *London*, if the Air be clear; but to those who Inhabit *Bermudas*, *Sancta Cruz*, the *Isle of St. John*, and all others that are removed four hours and a half *West* from *London*, it will appear in their *Meridian*.

The third will be of the *Moon* the 10th of *November*, at 36 minutes past Six at Night, and may be seen at *London* if the Air be clear, and you willing to attend it.

The fourth and last will be of the *Sun* the 26th day of *November*, at 36 minutes past Seven in the Morning, but by the *Perseus Tables*, at almost 42 minutes past Seven, so that the middle of the *Eclipse* will be before *Sun* rising, and the *Sun* will rise Eclipsed, as may be seen, if the Air be clear, at *London*.

In my last years Almanack, I did promise to say something of the *Eclipse* of the *Sun* *December* the 6th, 1694. at which time the *degr.* of *Cancer* ascends, and 4 *degr.* of *Pisces* culminates in the *Midheaven*. *Ptolomy* tells us, That *Eclipses* in *Sagittary* open their Power and Effects on Mankind to their Detriment and Injury; and threatens Destructions of all sorts of Fowles used for Food and Subsistence. It falls in the last Decanate of *Sagittary* in *Opposition* to the *Horoscope* of *London*, and for that reason may shew some of its Effects on the Affairs, and the Inhabitants of that City; and this the rather, because of *Jupiter's* late Transit through that Sign, who leaves always a malignant Effect behind him. Besides, it is a Humane Sign, and falls in the Sixth house of Heaven, whence we may rationally expect it to shew its Effects in Sicknes and Diseases in Humane Bodies, with Drought and Sterility, which may perhaps be more visible and remarkable in those parts where it is visible in their *Meridian*; and indeed, I cannot believe an *Eclipse* hath that force and power in its Effects in that Hemisphere where it is not visible, as it hath where it is seen. But perhaps it may be objected and said, That by this Rule, Conjunctions of the Planets under the Earth should have no Effect in the other part of the Hemisphere. To which I answer, The case is here quite different, for any Conjunction (nay, even that of the *Sun* and *Moon* too) passeth both Hemispheres without any considerable Separation, and seems to proffer it self to be seen by all Mankind, who one way or other must partake of its Effects; but this of an *Eclipse* is to be seen but by one part of the Earth, and therefore that part is most like-

ly to Eclipses in general. Nor do I believe as the Authors persuade us, that Eclipses on the *Ascendant*, the *Sun* and *Moon* &c. in Nativities kill: But that is too large a Subject to be handled in this place, and may of it self command a Volume; and so I come to speak a word or two on the Effects of the Eclipses in 1695. I mean those that are visible in *London*.

The first Eclipse that is visible to us in this Hemisphere, that of the *Sun*, *June* the first, at half an hour past Four the Clock in the Afternoon, at which time 26 degrees of *Leo* culminates, and 11 degrees of *Scorpio* ascends in the East: this solar Defect falls in the Eighth house in our Meridian, and in the last Decanate of *Gemini*, a Humane Sign, and the Ascendant of the Famous City of *London*: The *Sun* governs the Subsequent Angle, and the Glorious Planet *Jupiter*, in it in Sextile to the *Sun*, *Moon*, and *Mercury* in *Gemini*, the place of the Eclipse. Hence I am of the opinion, it doth not preface a Mortality in *London*, as some think, but only difference among the Magistrates and Governors of that City about things relating to their Corporation-business, which is enough signified by the Square of *Jupiter* and *Mars*, from the Tenth and Seventh houses; it also shews Difference and Disappointment in Publick Affairs, but no Mortality from that; but the Oppositions of *Mercury* and *Saturn*, and the *Sun* and *Saturn*, may give some such thing, and therefore place on its proper Cause.

The second visible Eclipse, is of the *Moon* on *November* the Tenth day, at almost Seven of the Clock at Night; it falls in the Eleventh house, among the *Pleiades*, in Square to the *Sun*, and in Opposition to a certain Tyrants Horoscope. The Lord return his Perjuries, Oppressions, and Blood upon him and his. And indeed, this Eclipse seems directly to threaten him in good earnest; he having had his *Sun* to the Square of *Venus* in Operation, ever since *Midsummer*, 1694. and about the time of this Eclipse, his *Sun* comes to touch the Square of the *Moon* by Direction, and both these having Dignities in the Seventh house at his Birth. Let him count his Success he hath had since the *Sun* and ☐ ♀ toucht in 1694. and then consider what he may expect under the Power and Operation of this of the *Moon*. Let his Popish Astrologer, and his other Scorpionist say what he will, he will Cheat him as he

done the Papists before, and in particular his Master James, who he said (to several) was to be restored on M. G. ad Corpus 4 and Δ of \odot in 1694. this he trumpeth out in 1693. But as to the Eclipse, it is an angry one, the Sun and Moon being both in Square to Mars with Cor. A; it shews loss and damage to Beasts, both wild and tame; ruin and destruction to Old Buildings, with differences among the Ecclesiasticks.

As to the third visible Eclipse on November the 16th. It according to Mezzavachis, a great Eclipse; it falls in direct Square to the Tyrant's Sun, and if he hath not by this time purchased a Peace, he will be shortly in a very ill condition, and the longer the worse: The Lord hasten Ruin for the good of Europe, and his own Nation and People.

To conclude, having run over the whole Year, and considered the various Configurations therein, as Conjunctions, Transits, Returns, Eclipses, &c. I do really judge there will be mighty Endeavours used for Peace in the former and latter parts of the Year, but I fear without Success; yet I judge the Offers and Ways propounded to that end in the latter part of the Year, will be effected, tho' for some time deferred. And therefore I heartily pray for King William and Queen Mary, that God will give them the Hearts of their Friends, and the Necks of their Enemies of all sorts.

Copy of a Letter I received Jan. 11. 1694. from an unknown Hand, which I here give you in his own Words and Spelling.

TIS pity but all such Usurping, Slandering Rouses, as you should have a Gallows for your Reward; and if the times should chance to turne, as I hope it will in some short time, you shall certainly be requited for your Diligence.

It makes my Blood rise to see and hear such an *Uterate Excombe* as thou art, Scandalize a Prince of so Noble a Blood; whose Actions were they equal to what thou sayest of them, (which I will not beleive, because I know most of

By the words *Heretick Rogue*, you may easily guess at
Man and his Religion: And if we should allow this Man
speak the Sense of the whole Party when they get in
Power, the best word any Protestant (besides me) may ex-
pect from them, is *Heretick Rogue*, or *Heretick Dog*; and
the next Favour they will bestow upon you, this Gentleman
tells you in his first Paragraph, is a *Gallows*. Nay! you will
all receive this Character; not a Protestant, no! not a *Jacobite*
Protestant, if any such Tool there be, but must bear the
Badge of a *Heretick Rogue*, and be pilt upon by them who
he hath done them all the Service he can. For it is not
the nature of a Papist to *Protect*, *Defend*, and *Preserve*
Protestant, let them promise or pretend what they please
you have an Example of this in the *French King*; for when
the Prince of *Conde* raised a War against *Lewis* the 14th,
Protestants defended him, and kept his *Crown* on his Head, and
you see now how well he hath rewarded them for their Pa-
tride and Care: Just so will King *James* pay our *Jacobites*, if
he hath them in his Power to do it. But I perceive, I shall
not to be hang'd till King *James* comes, for which, I thank
his Worship that he hath given me so considerable a time
to live.

The words *Shance*, *Illeterate*, *Mercer*, &c. shews him

Wonder

An Answer to a Popish Jacobite Letter.

Wonder at his Zeal for *Popery* and *King James*; and indeed, he is a *Papist*, you can expect nothing else from him, nor he to be blamed; but if a pretended *Protestant*, he is not fast to his own Principles, or else he hath no Principles at all to pretend to: And yet the Men of this last Persuasion in *England*, have done the *French King* more Service than any twenty *Battalions* in his Army. Pray God they may receive Reward suitable to their merit.

But why the Men should pretend I have broke my Oath, and seems to abuse me for it, and justifies himself in keeping his, is a mystery to me what he means; For I never took any Oath to *King James*, nor do I intend it; and besides, doth he think that I am not bound by the Laws of Nature, as well as the Nation, to the utmost of my power, to defend and support a *Protestant King*, that is a real *Defender* of the *Faith*, as much as he is to support a *Popish One* for his own Interest and Safety. If he will consider, it is as broad as long, and he rather, because I owe a Duty to *King William*, and none to *King James*; and the reason is, one Protects me, the other would have destroyed me, as he did a great many besides.

And doth this Man think that I am bound by the *Doctrine* of *Non-resistance*, to make my self miserable for a *Prince* that did not keep his *Coronation Oath*, nor would he Fight to defend Himself and Nation; and what is worse, endeavoured to bring us under the *French Slavery*, or one equal to it, not to say a word of *Popery*. And besides, it is from this *Prince*, and his *Brother's* supporting of *France*, and making that *King* great in this last Thirty Years, that brought us into this Ruinous War, which we are bound to maintain, or else become a Prey to the *Tyranny* of *France* and *Rome*.

I perceive the Gentleman is angry at what I said last Year, in Answer to *King James's* pretended Declaration. How much I have served my Country in it, I will leave to others to judge, being satisfied I did my Duty. And seeing he doth threaten me, I will leave it to all to judge, who may be justly suspected, if any Mischief and Violence be done to me privately, and for any thing openly I set him at defiance, and desire him when he comes again, to bring his Name with him, and write better *English* and Sense.

An Answer to a Popish Jacobite Letter.

One day's Labour, and so doth one Day too,
A tollsome Labour for the next to do.
Dear Non-resistance taught us to Repent,
And gain'd an almost dear Experiment.
Thus you may see, and to your cost prove too,
What a mad Doctrine in a mad Age can do.
Read this Man, and you'll strait know your Doom;
French Potters first, then all the Plagues of Rome.
